

Overview of ARPES studies of cuprate and pnictide superconductors

Thursday, 26 July 2012 16:15 (25 minutes)

Dan Dessau
University of Colorado, Boulder

I will overview a few of the recent important contributions using ARPES to study correlated electron high T_c superconductors, including cuprates and pnictides. Topics will include superconducting gaps, pseudogaps and Fermi arcs.

Primary author: DESSAU, Dan (University of Colorado, Boulder)

Presenter: DESSAU, Dan (University of Colorado, Boulder)

Session Classification: High T_c Cuprates & Pnictides

Track Classification: High-T_c Cuprates
