# Office Safety

---

- How many of these simple steps do you currently practice?
  - Use APPROVED step stools and ladders (**NEVER STAND ON CHAIRS, DESKS, BOXES, ETC.!**)
  - KEEP aisles, walkways and floor areas clear
  - HOLD onto chair arms/back/seat when sitting or rising
  - PROTECT colleagues and yourself from slipping on spills
    - Clean up, barricade, report
  - CLOSE file, desk, and cabinet drawers
  - REPORT deficient conditions to supervisors or Facilities

## Earthquake Restraints

---

What items really need earthquake restraints?

- Items must be restrained if they are located on a surface 4 feet or higher from the floor and will either block egress or injure someone if it fell.
- Open shelves above 4 feet must have a 3/4" high lip or applied device (bar/chain) that restrains objects on the shelf.
- All bookcases, filing cabinets, racks, shelves, and storage cabinets that are more than 4 feet tall must be secured regardless of location.
