

Evidence for Higgs Boson Production in Association with a $t\bar{t}$ Pair

Tuesday, 29 May 2018 16:30 (25 minutes)

The search for the production of the Higgs Boson with a pair of $t\bar{t}$ quarks is both very important and very challenging. This talk presents the analyses using Higgs boson decays to $b\bar{b}$ pairs, to two Z bosons, to other multi-lepton final states, and to a pair of photons, using 36 fb^{-1} of pp collision data collected at 13 TeV, as well as their combined results.
