### Jet Physics at EIC - Shyh Wang Hall, 3104 (11:00 - 18:30)

-Conveners: Miguel Arratia; Mateusz Ploskon; Felix Ringer

| time  | [id] title   | presenter           |
|-------|--|---------------------|
| 11:00 | [110] Jets at the EIC , experimental considerations                    | PAGE, Brian         |
| 11:40 | [111] Jets and spin asymmetries at NLO                                 | VOGELSANG, Werner   |
| 12:20 | Lunch  |                     |
| 13:30 | [112] Jet angularities at the EIC                                      | LEE, Kyle           |
| 14:10 | [113] Jets at the EIC , experimental considerations                    | ARRATIA, Miguel     |
| 14:50 | [114] Probing Transverse-Momentum Distributions With Groomed Jets      | VAIDYA, Varun       |
| 15:30 | [115] DIS events shapes and $\alpha_s$                                 | LEE, Christopher    |
| 16:10 | Break  |                     |
| 16:30 | [116] Diffractive dijets at the EIC                                    | Dr HATTA, Yoshitaka |
| 17:10 | [117] Parton Energy Loss and the Generalized Jet Transport Coefficient | ZHANG, Yuan-Yuan    |
| 17:50 | [118] Jet simulations in e-A with JETSCAPE                             | KAUDER, Kolja       |
