

Nuclear Structure 2022

June 13-17, 2022 - Berkeley, CA

Dear Colleagues,

We would like to cordially invite you to join us for the Nuclear Structure 2022 conference (NS2022), currently planned to take place on-site at Lawrence Berkeley National Laboratory, from June 13-17, 2022. This is the 18th meeting in the Nuclear Structure series, following the 2018 conference held in East Lansing, MI and after the cancellation of NS2022 due to the COVID-19 pandemic. We are in the process of assembling an exciting scientific program, focusing, as is tradition, on recent experimental and theoretical research on atomic nuclear structure at the limits of mass, isospin, excitation energy, and angular momentum.

In addition to a week of science, you will also have an opportunity to enjoy all that the California Bay Area has to offer, with spectacular views, proximity to vibrant San Francisco and much more.

We would like to invite you to submit abstracts beginning in February 2022, through the end of March 2022, at the conference website - <https://conferences.lbl.gov/e/NS2022>. Also, stay tuned for updates as we get closer to NS2022. While we are planning to see you in Berkeley in June, we are staying flexible!

-- NS2022 Local Organizing Committee

Kymba A'Hearn, Lee Bernstein, Chris Campbell, Rod Clark, Heather Crawford (chair),
Mario Cromaz, Paul Fallon, Tom Gallant, Jacklyn Gates, Augusto Macchiavelli,
Jennifer Pore and Larry Phair
