

Nuclear Structure 2020

July 26-31, 2020 - Santa Cruz, CA

Dear Colleagues,

We would like to cordially invite you to join us for the Nuclear Structure 2020 conference (NS2020) to take place in the hills above Santa Cruz, California, July 26-31, 2020, hosted by Lawrence Berkeley National Laboratory. This is the 18th meeting in the Nuclear Structure series, following the 2018 conference held in East Lansing, MI. We are in the process of assembling an exciting scientific program, focusing, as is tradition, on recent experimental and theoretical research on atomic nuclear structure at the limits of mass, isospin, excitation energy, and angular momentum.

At the [Chaminade](#) in Santa Cruz, in addition to a week of science, you will also have an opportunity to enjoy all that the California coast has to offer, with spectacular views, the beach and boardwalk only minutes away, and classic California weather. All meals are provided on-site, with ample opportunity for discussions on the patio overlooking the Pacific.

We would like to invite you to submit abstracts starting on February 20, 2020, through April 5, 2020, at the conference website - <https://conferences.lbl.gov/e/NS2020>. Also, stay tuned for updates as we get closer to NS2020. We look forward to seeing you in Santa Cruz!
