TAUP 2013

Tuesday 10 September 2013

High Energy Astrophysics II (16:00-17:40)

time	title	presenter
16:00	First Evidence of High-Energy Extraterrestrial Neutrinos at IceCube	KOPPER, Claudio
16:20	Measurement of the diffuse neutrino flux by a global fit to multiple IceCube results	MOHRMANN, Lars
16:40	Revealing Deaths of Massive Stars with High-Energy Neutrinos	MURASE, Kohta
17:00	Studying the chemical composition of the highest energy cosmic rays with the Pierre Auger Observatory	BELLIDO, J.
17:20	Constraints and measurements of hadronic interactions in extensive air showers with the Pierre Auger Observatory	CAZON, Lorenzo
