# Updates

---

## Good Time To:

- Review your WPC Activities
  - Work Scope up-to-date
  - Hazards still current (new telework hazard)
  - Training current (zoom classes)
  
- Inspect Lab / Office Areas
  - Hand Sanitizer
  - Wipes
  - Disinfectant Spray Bottles

# Lessons Learned

## **Preventing Noise-Induced Hearing Loss at Home**

- **Regardless of age, hearing plays an essential role in communication. Even a small amount of hearing loss can have profound negative effects.**
- **Most often results from exposure to loud sounds over an extended period (typically multiple exposures repeated over a period of years).**
- **Power tools and landscaping equipment (gas and electric powered), recreation equipment, and radios/TVs are common sources.**
- **If you find yourself in a situation where you cannot reduce the sound energy (i.e., turn down the volume), apply the ALARA (as low as reasonably achievable) principles to your situation.**
  - **Time**
  - **Distance**
  - **Shielding**
